Project Description:

- Work done carried out at Rajura (Bhiltek), District - Amravati, State-Maharashtra, Parliamentary/Lok Sabha Constituency- Wardha, and Name of Hon'ble Member of Parliament - Mr. Ramdasji Tadas.
- As an area, Sangameshwar is not well developed so they are suffering from many problems like - lack of job opportunities, lack of knowledge about business and due to lack of services the villagers have to migrate to nearby cities. To develop Sangameshwar as a tourist place by the traditional way, to give the employment opportunity to the nearby villagers and to develop the nearer area as well as empowering the women's strength. The main objective of these project to empowering the women and employment to villagers, these will indirectly increases the economical condition of the area and make the village independently sustainable. The area is full of naturally gifted but there is no proper landmark to trace that place and there is no good transportation facility, the lining of the water body is the essential task for us and to build small type of dam to store the water for the further use. The market need of that project is huge because not only it will provide economy but will also provide Sangameshwar as at that level of developed cities. As tourist industry is depended upon the career area, accommodation, food, beverage services, recreation, entertainment, travel services, transportation.
- Innovative solution for Development of Trivenisangam as a tourist Place at Sangameshwar is to make Accommodation facility. In the construction of rest houses and hotels, the construction is done from locally available material and gives it traditional, ancient look which is disappearing day by day. The method of cooking food is traditional, that means they are cook on muddy stove. Three river meets at single point is rarely seen and there is also ancient temple which is the centre of attraction. To enhance the spot, we are placing the monuments of Lord Mahadev below the water fall. Shrubs, bushes and trees makes the place more oxygenated, planting more trees makes the area fresh. Based on the involvement or contribution, employment opportunities in tourism and hospitality sectors can be created either directly or indirectly. Direct employment opportunities include the total number of job opportunity supported by travel and tourism. Sample jobs include:

Adventure tour guide, Cook, Sales coordinator, Supervisory jobs, Management position, Development to address the problem.

- To develop Sangameshwar as a tourist place by the traditional way, to give the employment opportunity to the nearby villagers- Rajura, Bhiltek, Ekpala, Tonglabad etc thereby to develop the nearer area as well as empowering the women's strength. The main objective of these project to empowering the women and employment to villagers, these will indirectly increases the economical condition of the area and make the village independently sustainable.

Delivery model of Trivenisangam as a tourist Place at Sangameshwar

Approximate cost of construction for following content in Lakh.

Road (10.0), parking (5.0), Bridge (60.0), Rest house (10.0), Garden (10.0), Hotel (15.0), tunnel (25.0), monument (10.0), retaining wall (20.0), temple (25.0), solar panel (10.0) [monocrystal solar panel], Total 2 Cores 5 lakh approximate costing will accept.

Cash collection [counter] Entry fee Hotel Parking Rest house Tunnel Cash collect from one person – rupees- 850/-. One day collection for 20 people – 17,000/- rupees, week collection approximately for 100 people-85,000/- rupees, monthly collection approximately for 300 people – 2,55,000/- rupees and year collection approximately from 3500 people- 29,75,000/- rupees. So we will have earing initial cost in seven year only and thereafter only revenue will generate.

- Appreciation letter from Hon'ble Member of Parliament - Yes

Conclusion/Future Scope to enhancement:

This project will provide employment to villagers as well as women empowerment which will help to increase the income of that village. It will play an important role in development of villages nearby that place. These places made for the entertainment and take traditional knowledge from games. These also can make people peaceful and healthy.
